Keramik Manufaktur Steyr 1491

Spa Design with Heat Storing Ceramics

The Sommerhuber Ceramic Manufacture produces special Heat Storing Ceramics for body-contact surfaces in Spas. Because of their specific characteristics, Heat Storing Ceramics are used especially where there is a body-contact with the surface. Large-area pieces result in less joints.

Heat Storing Ceramics emit mild, long infrared waves almost exclusively in the spectrum of infrared C. These gentle infrared waves touch only the first layers of the skin making them especially soothing and relaxing for the human body and mind.

- Heated Loungers
- Heated Benches & Seats
- Ceramics for Steam Rooms & Tepidariums
- Hamam Tables
- Healing Clay Spas
- Foot Basins

www.sommerhuber.com

We humidify the air for your well-being.

Steam generators are the key element for steam baths, sauna areas and relaxation rooms. In spa and wellness facilities, regulated heat and hygienic steam ensure clean, healthy air humidity which helps to relax, rejuvenate and stay well.

HygroMatik offers the perfect product fit for every spa application.

HygroMatik steam generators are:

- Easy to operate and low maintenance
- Reliable with extensive service life
- Proven quality and highest safety standard
- Economical with optimised unit performance
- Environmentally friendly with reusable/replaceable components

www.hygroamatik.com
